

Ultrane 500

DESCRIPTION AND GENERAL PROPERTIES

Material Nitrile GRIP&PROOF coating

Length (inches) 9.06-11

Thickness (inches) Light Weight

Wrist Knitted wrist

Colour/Color Black

Interior finish Seamless textile support

Exterior finish Ventilated back

Size / EAN 6 7 8 9 10 11

Packaging 1 pair/bag - 12 pairs/bag - 96 pairs/carton

Complementary information Guaranteed DMF free and guaranteed Silicone free

PERFORMANCE RESULTS

Certification category 2

CUT

4121X
ISO 13997 :
3.4 N (327g)

Dexterity EN 420 : 5/5

ISO 13997 defines the weight on the blade required to cut in a single movement.

Data was obtained according to ISO 13997, from the average of several measurements. As individual specimens will obviously have greater or lesser cut resistance than the average, so this result can provide only a general indication of the cut resistance of any protective material.

SPECIFIC ADVANTAGES

Oilproof, it repels oil penetration and reduce dermatitis
Grip and Proof coating ensures an excellent grip in oily environment . It also reduces muscle strain and boost productivity
Excellent abrasion resistance due to the nitrile coating
Long lasting and cost effective glove: washable until 5 cleaning cycles (see laundering and drying conditions)
Attractive dark colored glove adapted to the industrial environments
Available in vending machine packaging

MAIN FIELDS OF USE

Automotive/mechanical industry

Machining parts using cutting oil
Handling sheet metal
Handling oily mechanical parts
Handling and sorting small, sharp parts

Glass industry

Handling glass sheets

Other industries

Maintenance in wet environments

Mechanical industry

Maintenance in wet environments (water, oil, greases, hydrocarbons)
Cutting and stamping metal

INSTRUCTIONS FOR USE

Instructions for use

It is recommended to check that the gloves are suitable for the intended use, because the conditions of use at workplace may differ from the "CE"-type tests.

It is not recommended for persons sensitized to dithiocarbamates and to natural latex (wrist with elastic natural rubber).

Put the gloves on dry, clean hands.

Ensure the insides of the gloves are dry before putting them on again.

Storage conditions

Store the gloves in their original packaging protected from heat, light and humidity.

Laundering conditions

Wipe gloves contaminated with oil or grease with a dry cloth before removing them. Performances of the gloves are not negatively affected by cleaning up to 5 cleaning cycles* under the conditions described above: Use of a household or industrial washing machine and a standard liquid detergent, synthetic program temperature 60 ° C and spin drying at 400 rotations per minute. Improper use of the gloves or submitting them to a cleaning or laundering process that is not specifically recommended can alter their performance levels.

The customer or the launderer is sole responsible for the compliance with the washing conditions.

* Test performed: 5 successive washes on unworn gloves.

Drying conditions

Tumble drying at 60°C maximum. Ensure the inside of the gloves is dry before putting them on again
